

M1A HANDSET

IDENTIFICATION, CONNECTIONS, AND MAINTENANCE

1. GENERAL

1.01 This section contains information on the M1A handset (Fig. 1).

1.02 Whenever this section is reissued, the reason for reissue will be listed in this paragraph.

2. IDENTIFICATION

A. Application

2.01 The M1A handset is a small, compact modular handset intended for use with the 5001T01A and 5011T01A telephone sets.

Although the M1A handset is equipped with a modular jack it is not to be used as a replacement for existing G- or K-type handsets.

B. Ordering Guide

2.02 Order as follows:

- Set, Hand, M1A-*
- Cord, Handset, H4DU-*

*Add color suffix: Ivory (-50), Green (-51), Yellow (-56), White (-58), Brown (-104), and Rust (-124).

C. Design Features

2.03 The M1A handset is a sealed unit which uses an LB3 receiver unit and an EL2 electret microphone as the transmitter unit.

3. CONNECTIONS

3.01 Connect the M1A handset by plugging the handset cord into the jack located beneath the transmitter and plug the other cord end into the handset cord jack mounted in the telephone set

base. Be sure the handset cord retaining clip locks into place.

3.02 To replace the M1A handset, depress cord retaining clip and remove the handset cord.

3.03 Refer to Fig. 2 for internal connections of the handset.

4. MAINTENANCE

4.01 The M1A handset is a sealed unit, therefore maintenance of the handset is limited to cleaning with a water-dampened cloth.
