

TELEPHONE SETS

881C111 AND 2881C111

1. GENERAL

1.01 This section contains identification, installation, and connection information for the 881C111 (Fig. 1) and 2881C111 DESIGN LINE* telephone (The SNOOPY & WOODSTOCK® Phone**) sets.

Warning: Telephone apparatus or wiring shall not be installed in a location where minimum separation from other wiring as specified in Section ♦460-300-149♦ cannot be maintained.

Fig. 1—881C111 DESIGN LINE Telephone Set

1.02 This section is reissued to:

- Change section number in 1.01 Warning.
- Add 225A adapter

1.03 The customer's premises must be properly wired with an appropriate connecting block or jack in order to accept the D4BU-29 plug-ended mounting cord.

2. IDENTIFICATION

2.01 The 881C111 (rotary dial) and 2881C111 (TOUCH-TONE® dial) equipped telephone sets are new DESIGN LINE telephone sets being made available to the customer. The customer buys the housing and handset from the telephone company and the telephone company retains ownership of the transmission and signaling components.

2.02 Refer to Table A for available codes and ordering information.

2.03 These telephone sets are intended to be used as single line or two-party desk sets and are not recommended for use on four- and eight-party service.

3. INSTALLATION AND CONNECTIONS

3.01 These telephone sets are furnished from the factory fully assembled and wired for bridged ringing. To connect the telephone set, plug the mounting cord into a 625-type connecting

*Trademark AT&TCo.

**Housing manufactured by American Telecommunication Corporation.

block or if the existing jack is a 548A or equivalent, use the 225A adapter or 1A converter, ordered separately.

3.02 Connections for the 881C111 and 2881C111 telephone sets, for nonkey system use, are shown in Fig. 4 and 5.

3.03 Connections for 1A KTS require no telephone set modifications and are wired same as Fig. 4 and 5.

3.04 If these sets are to be used with 1A1 or 1A2 key telephone system the set must be modified by moving the brown (BR) line switch lead from L2 to G on the network.

3.05 To gain access to the interior of these sets for wiring changes, refer to Part 4.

3.06 Line and Ringer Connections.

- (1) For single line and two-party service, refer to Tables B and C.
- (2) For adjustments and ringer cutoff feature of the P1A ringer, refer to Section 501-259-101.

3.07 When needed, a polarity guard assembly can be mounted to the right hand dial mounting bracket. Refer to Table D for connections.

4. REMOVAL OF TELEPHONE COMPANY-OWNED COMPONENTS

4.01 When it is desired to discontinue telephone service of these DESIGN LINE telephone sets, proceed as follows.

Note: Remove telephone company-owned components that can be easily removed. To provide the appearance of a complete telephone set, components such as the dial and handset cord will remain with the telephone set.

- (1) Remove four base mounting screws from the bottom of the telephone set (Fig. 2) and remove bottom base.
- (2) Remove two line switch mounting screws and remove line switch (Fig. 3).
- (3) Remove two network and two ringer mounting screws from the base and remove network and ringer (Fig. 3).
- (4) Unscrew transmitter and receiver caps and remove transmitter and receiver units.

4.02 Follow local procedures for returning telephone company-owned components.

4.03 When it is desired to return a set to Western Electric for repair, it should be packed using the D-180867 Kit of Parts which contains packing materials and instructions.
