

21A COMMUNICATION SYSTEM
DESCRIPTIVE AND ORDERING INFORMATION
("COM KEY" 2152 KEY TELEPHONE SYSTEM)

1. GENERAL

1.001 This addendum supplements Section 518-450-100, Issue 3. Place this pink sheet ahead of Page 1 of the section.

1.002 This addendum is issued to add descriptive and ordering information on the connection of a 4-wire (SS1/SS4 Selective Signaling System) to the 21A Communication System. Installing connection, and maintenance information is contained in Task Oriented Practice (TOP) 518-450-111.

2. CHANGES TO SECTION

2.001 On Page 1, title has been changed.

2.002 On Page 2, under Optional Features, add the following:

AB. 4-Wire Service

2.003 On Page 12, after paragraph 5.07, add the following:

5.08 D-180990 Kit of Parts: This kit of parts contains a transfer relay (order one for each telephone set or console requiring 4-wire service).

2.004 On Page 32, after paragraph 8.88, add the following:

AB. 4-Wire Service

8.89 *Caution: Transmission quality may be badly affected if 4-wire lines are conferenced with central office lines.* Any telephone or console in the 21A Communication System can be modified and connected to pick up one or more 4-wire circuits at a Selective Service System (SS1/SS4). Incoming selective signaling of the COM KEY Key Telephone System station is provided. The 4-wire transmission integrity is maintained all the way to the telephone or console. This service can be either rotary or TOUCH-TONE® calling. No COM KEY Key Telephone System features are sacrificed.

NOTICE

Not for use or disclosure outside the
Bell System except under written agreement
